

Project-based tool rental ordering guide Interior Painting

At Toolio, we remove the guesswork from project prep. Every bundle is designed to save you money across the full tool list—not just the big-ticket items.

We believe in transparency, so you'll find each bundle broken down with model numbers and why each item matters.

That said, you don't need to study the details—we've already done the research so you don't have to.

Our goal is simple: equip you for success. That means including not only the obvious tools, but also the specialty items that speed up work, improve finish quality, and cover the surprises you might not anticipate.

How ordering works:

Comprehensive – Our flagship package.

Every tool you'll need, even for the unexpected. Backed by our guarantee: if you're missing something, we'll deliver it same-day at no cost.

We count # of successful projects - not just # of tools rented

Essentials – The core set of tools for a project.

With this package, we assume you own common household / DIY items like extension cords, water hoses, power drills, and safety gear.

Advanced - Specialized tools that are rarely worth buying but make a big difference in speed and results.

Each level builds on the one below: Advanced \rightarrow Essentials \rightarrow Comprehensive.

All products follow our similarity policy: if we substitute, it's always for equal or better performance. Standard/commodity items (like liners or screws) may vary by vendor, but function is identical.

At Toolio, we don't measure success by the number of tools rented—we measure it by the number of projects finished right.
